- ? (GBCSA non-member): R 1250 excl. VAT

**Time:** Registration 13h30, Course 14h00-17h00

### **COURSE DETAILS**

The Green Star SA Project Certification Workshop is an advanced course suitable for anyone who has either completed the Green Star SA Accredited Professional course (recommended), is familiar with the Green Star SA certification procedure or is actively working on a Green Star SA project. The course is aimed at those who wish to gain greater insight into the certification process and the compilation of high-quality Green Star SA submissions for formal certification. The course is designed to teach participants about the process of registering a project, collecting and compiling documentation, ensuring appropriate documentation quality, optimising electronic submissions and completing the assessment process. The aim is to ensure that participants learn how to make the certification process as streamlined, cost effective and time effective as possible for their projects and clients.

This half day intensive workshop will be presented by GBCSA staff and an industry expert with submission compilation experience. Participants will also benefit from a small classroom format with group discussions and the combined expertise of a multidisciplinary group. This course is highly recommended for the lead Accredited Professional on a Green Star SA project as well as other members of the project team.

Please Note: This is not an introductory course to Green Star SA for beginners, but for those who are already familiar with the Green Star SA credits and certification process.
